DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 5/31/01 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 15-18, 20, 23-26 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al [5,745,870].

Yamamoto et al '870 discloses a travel path prediction apparatus and method for vehicle, a relative position of a second vehicle traveling ahead of a first is determined at predetermine timepoints. According to Yamamoto et al, a travel path of the first is predicted as a function of the course of the second vehicle. See figure 3 and 4, 8. Yamamoto et al also discloses a transverse offset between the predicted course and a curvature of the road, wherein the prediction of the travel path is determined based on the offset. Yamamoto et al further discloses a selection for selecting from a plurality of courses. Although, Yamamoto et al does not particularly discloses a storage device, one of ordinary skill in the art would have been motivated by the teachings of Yamamoto et al

which compares the determined paths because such modification, as suggested by Yamamoto et al, would avoid possible collision of the vehicles, thereby improving safety.

Allowable Subject Matter

4. Claims 19, 21-22, 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
